

Effective as of 1 September 2024

Distribution prices for microgeneration (max. 1,000 kVA)

Electric energy fed into the network	0% VAT	25.5% VAT
Low-voltage network (0.4 kV), c/kWh	0.00	0.00
Medium-voltage network (10 or 20 kV), c/kWh	0.00	0.00

Terms of microgeneration

All production plants of under 1,000 kVA are regarded as microgeneration. The distribution fees of production plants larger than this are determined in accordance with the distribution prices for production.

Every production point must have a valid network service contract entitling to the use of electricity, according to which the distribution fees for consumption are charged in accordance with the price list.

Notifying of microgeneration

Helen Sähköverkko must always be notified of microgeneration to be connected to the distribution network. Microgeneration must be notified electronically. Further information is available on helensahkoverkko.fi/pientuotanto.

Sale of microgeneration

There must be a contract on the sale of microgeneration into the electricity network with an electricity vendor of free choice. Information about electricity vendors who purchase microgeneration is available on the sahkonhinta.fi website maintained by the Finnish Energy Authority.
